***TMW Wins AMM 2011 Award for Steel Excellence
Company Garnered Two Finalist Nominations***

(New York City) The Material Works, Ltd. has been named the winner of American Metal Market's 2011 Awards for Steel Excellence in the Environmental Responsibility/Stewardship category. TMW earned the honor for the development and successful commercialization of Eco Pickled Surface (EPS), an environmentally friendly replacement of acid pickling as a means to remove mill scale (oxide) from the surface of hot roll strip steel. The EPS process was also nominated as a finalist in the Best Innovation category.

The AMM Awards for Steel Excellence recognize advancements rooted in pioneering and implementing business improvements that deliver real change to the steel industry. *"The award winning companies have shown tremendous creativity, inventiveness and are pioneers in creating the way to a better future for the steel industry,"* said Raju Daswani, President of American Metal Market.

For information on the Eco Pickled Surface process, visit www.epsprocess.com.
