

We proudly offer the finest sheet steel product on the market. **EPS Unlimited** combines EPS Pickling with Stretcher Leveling for ultra flat shape, and a clean, oil-free surface optimized for paint performance and appearance.

EPS Unlimited

the ULTIMATE Sheet Product

Outperforms All Acid
Pickled Sheet Products
– Roller Levelled or
Temper Passed –
GUARANTEED

EPS Unlimited will meet or exceed the performance of:

- Acid Pickled & Oiled • Acid Pickled Dry • Hot Roll Black
- Temper Passed • Roller Levelled

against these criteria:

- Paint Adhesion • Paint Corrosion • Flatness After Lasering
- Laser Cutting Speed

or we buy the steel under our money back guarantee.

competitive steel parts and EPS Unlimited parts must originate from same coil heat.

"I'm so impressed with **EPS Unlimited**. We proved it's rust-resistant and we obtained excellent salt spray test results. It even removes the silicon streaks. And with no oil, there's less smoke in our thermal processing and our paint pretreatment system stays much cleaner."

– *Matt DeJong,*
DeJong Manufacturing

Which Is The Right Sheet Steel For You? For Your Customers ?

Property	EPS Unlimited	Hot Roll Black	Acid Pickled Oiled	Acid Pickled Dry
Surface Free of Scale	★★★★		★★★★	★★★★
Surface Free of Oil	★★★★	★★★★		★★★★
Paint Corrosion Resistance	★★★★		★★	★★

"EPS removes scale and gives us a very smooth, oil-free surface, while Stretcher Leveling gives us the reliable flatness we need. As a result, we're getting consistent laser cutting with a significantly reduced scrap rate and improved cutting speed."

- Don Zajicek, General Manager
Kloeckner Metals - Houston

"Our customers see great value in **EPS Unlimited** dry compared to a traditional pickled and oiled surface. They have been able to increase laser cutting speeds by 20 to 30% and on top of that, can skip shot blasting prior to painting."

- Timo Vierimaa, President
Peak Metals - Northbrook, Illinois

"EPS Pickling plus Stretcher Leveling creates an unrivaled value among prime steel products. A demanding customer of ours just raves about **EPS Unlimited**. The stress-relieved sheets laser great and the quality of the surface gives a reliable, high quality paint finish."

- Richard Klein, The Steel Works

"My top EPS user does everything - laser cutting, to press brake, to welding, to powder coating. He has no trouble performing any process using **EPS Unlimited**. From 14ga to 1/2", from CQ to Grade 50, anything he has ever done works as well with **EPS Unlimited** as it does with P&O."

- Steve Morrow, General Manager
Southern Metal Supply
